Pradhumn Chandrawat

Node JS Developer

Indore | 9754641184 | chandrawatpradhumn1@gmail.com

Objective

MERN Stack Developer with one year of experience specializing in Node.js, Express.js, MongoDB, and React.js. Proficient in building scalable web applications, developing RESTful APIs, and integrating third-party services like Stripe for payments. Skilled in implementing authentication and authorization, with a strong focus on performance and security.

Experience

GangaTara Technology | Junior Node JS Developer

Projects:

Ed-Tech Platform: Node.js Developer

Technologies: Node.js, Express.js, JWT, Bcrypt, MongoDB, Zoom API, Stripe

- Developed user authentication using JWT with role-based access control (admin, student, teachers), ensuring secure login and profile management.
- Implemented RESTAPIs for tasks, enabling users to manage educational tasks like upload lecturers, assign assignments and Tests.
- Built real-time functionality using Zoom's API for live real-time collaboration between students and instructors.
- Integrated secure payment gateways like Stripe and PayPal to handle course purchases and subscription payments.
- Designed an admin panel for managing courses, users, and content, with complete access control.

E-Commerce Website : Node.js Developer

Technologies: Node.js, Express.js, JWT, Bcrypt, Passport Js, MongoDB, Stripe, FedEX APIs

- Developed a scalable platform with user authentication (JWT-based) and Authorization.
- Implemented product listing, searching, and filtering features for an optimized shopping experience.

- Built a robust shopping cart and order management system, enabling seamless product purchase and order tracking.
- Integrated payment gateway solutions using Stripe for secure online payments.
- Created an admin dashboard for managing products, orders, and users with full CRUD functionality.
- Enabled order tracking using FedEx APIs for dynamic updates on order statuses.

Work under a Freelancer: Full Stack Developer

Technologies: React JS, Chart JS, Node.js, Express.js, JWT, Bcrypt , MongoDB.

- Developing an Automatic Vehicle Testing Line Software to check the vehicle different features like speed, breaks, headlight, suspension, smoke PUC etc.
- Developing a Frontend and Backend using React JS, Node JS and MongoDB like Login/Logout from, Admin Dashboard, show charts and Guage meters implementing using Chart JS.

Education

Centre for Development of Advanced Computing, CDAC Noida   **2023**

PG-Diploma (Development of Advanced Computing)

Skills & abilities

Languages: JAVA, OOPs, JavaScript, SQL, No SQL

Frameworks and Libraries: React JS, Node JS, Express JS

Technologies: RESTAPIs, Payment Integration, Authentication/Authorization, Postman, GitHub/Git, AI Tools.
